

How it *Works*

The Buzzy's secret is that it pulls the operator, allowing wheelchairs to take on terrain they never could before. And because The Buzzy doesn't attach to the chair or the user, security and independence are always maintained. Push the throttle to go, release it or use the hand brake to stop, and turn by simply pushing the handle. What could be easier?

Features

- Variable Speeds
- Adjustable top speed, up to 9 mph

A Revolutionary New way to be Mobile!

Let's face it - you love your chair, but there are those moments when you wish that you were, well, just a little more *mobile*. With **The Buzzy**, now your wishes can come true! **The Buzzy** is a **NEW** product that enables wheelchair users to have greater mobility than ever before! Now you can explore places that you never would have tackled with your chair alone. Paved surfaces, parks, nature trails, off-road, amusement parks - even golf courses - all are now wheelchair accessible with **The Buzzy**!

Do More!

The Buzzy wasn't designed to replace you or your chair, it's simply here to help you explore new places, go longer, see more, and *do more...* - that's what The Buzzy is all about!

A Revolutionary New Way to be Mobile

The physics of being pulled - instead of pushed - allow wheelchairs to go places they never could before.
